

WHY A SPECIALTY CONTRACTOR SHOULD JOIN THE **AGC NYS**:

As the strongest and most widely respected construction association in New York State, the AGC NYS represents the interests of all construction contractors and specialty contractors. The programs and services provided by AGC are as valuable to Specialty Contractors as they are to General Contractors.

AGC NYS PROGRAMS & SERVICES:

- **Government Relations** ... Lobbyists fight for and protect the interests of the construction industry's contractors both locally (Albany) and nationally (Washington, DC).
- **Regulatory Oversight**... Making sure rules and regulations are both in place, yet not overburdening the contractor.
- **Market & Infrastructure Development**...Continually working with the Legislature both at the State and National levels to fund and develop construction markets.
- **Education** ... Extensive teaching programs are in place from grade school to mid-career management professionals. The AGC is dedicated to educating all age and career levels to maximize performance and productivity.
- **Safety Services** ... Our team of safety professionals offers a variety of services including jobsite inspections, OSHA 10 & 30 hour training, corporate safety advisory, and written safety programs.
- **Field Services** ... AGC staffers are always hitting the road visiting members and prospects. Our staff can always be reached to discuss hot industry topics.
- **Committees** ... AGC NYS and AGC of America have a host of committees designed to give direction to the association and confront the many issues facing the contractor and the industry.
- **Meetings** ... An Annual Membership Meeting is held during the summer, usually at a New York resort. The AGC NYS / DOT Technical Conference is a 3-day event held in December. Regional membership meetings are held regularly.
- **Awards Programs** ... Recognizing outstanding building and highway construction projects, and highlighting outstanding safety programs and practices are just a couple of the awards programs of the association.
- **Scholarship Programs** ... Scholarships are given to deserving students pursuing undergraduate degrees in construction-related fields who show a true interest in pursuing a career in the construction industry.
- **Publications** ... AGC NYS publishes its *AGC Connection* newsletter bi-weekly; the *AGC Cornerstone* magazine; industry bulletins as needed; and a complete website of information.
- **Networking** ... Perhaps the greatest resource of membership – other members. Share ideas and new problem-solving techniques during one of our many meetings, seminars, and events.

***Membership in the AGC NYS is like putting the entire association to work for you.
Don't wait – join today!***
