---

Construction firms surviving in this economy have trimmed their overhead to the bone. The only places to find additional, hidden profits are the jobs themselves.

In this session you will:

- Learn to streamline the take-off process using digital plans and on screen take off software eliminating reproduction costs and creating more capacity in your estimating department.
- Automatically organize take off quantities by Area, Floor, and WBS (Work Breakdown Structure).
- Hear Tips and Tricks from estimators who use the software every day .
