AGC NYS Contractor Focused Programs and Services

Governance, Networking & Committees

AGC NYS is committed to improving the construction industry through its programs and services, and is led by a Board of Directors that provides guidance and direction towards the association's goals and objectives. Membership meetings are held regularly. AGC guides a host of committees made up of contractors and their associates focusing on industry issues.

Safety

Recognizing that a safe workplace is a productive workplace, AGC NYS has developed safety services to educate members and their employees on safe work practices and field conditions to assist members with OSHA concerns.

AGC of America

Membership in AGC NYS grants you membership in AGC of America, the leading national construction trade association representing all facets of construction for both public and private entities. AGCA represents over 32,000 leading firms in the industry. For more information, visit www.agc.org.

Funding Efforts

AGC NYS is in constant contact with the State Legislature, the Governor and our Congressional Delegation; advocating for increased investment in our state infrastructure.

Partnering

AGC NYS's Partnering/Project Alignment facilitation service is a project-specific business plan to develop effective teams working in concert with each other in order to achieve mutually agreed-upon goals. This program develops processes for managing project risks and resources to achieve successful project completion.

Labor Relations

The foundation of AGC NYS is the advancement of the industry as a quality and ethical industry with equal opportunity for all contractors regardless of individual philosophy. The Labor Relations Division negotiates highway/heavy collective bargaining agreements with many trades in New York State.

Letting Information

AGC NYS members are provided with the most current and complete information on project letting schedules from the NYS DOT and Thruway. We supply the list of scheduled projects with item numbers and quantities, related plan holders, advance notices and results on letting days as well as unit pricing for all projects.

Publications

To keep members up-to-date on important issues, AGC NYS publishes a bi-weekly newsletter and a quarterly magazine, as well as an annual membership directory. Bulletins and alerts are used to disseminate time sensitive information.

Government and Legislative Relations

AGC NYS is the leading public policy organization of the construction industry and serves as a valuable resource of information and advocacy to elected officials. Our unique integration of public policy, political action, media, grassroots advocacy and strategic partnerships are a powerful tool to advance the interests of the construction industry. As a member of AGC NYS, you will have access to an integrated and effective public policy advocacy team of seasoned lobbyists and political professionals.

Political Action Committee

The AGC NYS Political Action Committee is actively engaged in state and federal elections. AGC NYS PAC hosts special events for key elected officials and candidates seeking office with a strong record of supporting the construction industry. The non-partisan committee carefully evaluates legislative activity and the political process in determining candidate support.

Specification Review

One of the unique services of AGC NYS is our "spec review" service. AGC NYS reviews public and private owner bidding documents to ensure they are concise, complete, and they comply with rules of good practice and equity in the industry, applicable law and equity. We are also actively engaged in drafting standard specifications through joint committees with public agencies and authorities.

AGC NYS Education & Training

Continuing the education of your staff is a prime focus of contractors in the fast-moving, ever changing field of construction. Trained staff is critical to the advancement of your firm. AGC NYS, in cooperation with the AGC of America and a variety of related industry groups, develops a number of programs to educate and train today's AGC workforce.

AGC Project Manager Development Program provides the essential skills of project management through five separate courses on Leadership, Estimating and Job Costing, Contract Administration, Risk Management & Project Administration. Each highly interactive, 16-hour course is held over two days providing participants with the necessary knowledge and skills to enhance their ability to work successfully with others to ensure project success.

Future Construction Leaders Program involves mid-career professionals who have been chosen by their companies as future leaders in the industry. The students meet four times during the year to learn from industry experts on topics that normally would take attendees years of on-the-job training.

Annual Construction Industry Conference

Presented over several days, our annual Construction Industry Conference is a multi-discipline, training event and trade show.

For more information, please visit: www.agcnys.org

"AGC NYS is in the forefront improving industry relations and advocating on our behalf both in New York and Washington DC. With the many economic and labor challenges that face the industry, AGC NYS also provides the latest training and education programs that keep members up-to-date and allow us to adapt to an ever changing business climate." - Peter Tully

"E.W. Howell has been a member of the AGC NYS for over 46 years. Ralph Howell Jr. served on the board of the then GBC NYS and eventually was President of the Association in 1982. Recently, both myself and Paul O'Rourke, Executive Vice President, have served terms on the board representing the Long Island region. I can speak personally of the period 1983-2011, my tenure with E.W. Howell. During that period the GBC NYS, now the AGC NYS, have proven to be indispensable allies in our efforts to navigate the sometimes difficult waters of General Contracting and Construction Management in New York State. We owe a significant part of our success to their past and continued efforts." - Howard L. Rowland, President, E.W. Howell
