

AGC New York State presents:

The Project Manager/Engineer Development Program

Program Overview

This new program will provide the essential skills of project management through five separate courses. Each highly interactive, 16-hour course will be held over two days providing participants with the necessary knowledge and skills to enhance their ability to work successfully with others to ensure project success. Since 2009, the AGC NYS has graduated over 90 individuals from the program and countless others have taken a few select classes.

Who Should Attend?

The PMDP is designed for early-career project managers/engineers and those that aspire to be in such a role. Attendees should be individuals who are familiar with construction at a project level, people who may or may not have post-high school education in a construction-related field, or individuals with undergraduate degrees in a construction-related field with some project experience.

Assessment of Learning Objectives

Participants' achievements of learning objectives and goals will be assessed by working in case studies and classroom discussions/activities.

MODULES & SESSION TITLES

MODULE LEARNING OBJECTIVES

Session 1: Leadership - Albany

October 12-13, 2016

- Module Overview
- Professional Issues
- Working in Teams
- Managing Conflict
- Managing Your Career
- Customer Satisfaction

Session 2: Estimating & Job Costing

- Learn the importance of an estimate
- Understand the different types of estimates
- Develop professional estimating skills
- Appreciate the importance of good documentation and consistent formatting
- Gain awareness of how accurate cost information is critical to the success of the company
- Understand the link between design, estimating, and project costs
- Learn how equipment costs are developed and integrated into the estimate
- Learn how work by others is included in the estimate
- Learn how general cost and overhead not assignable to a specific task are included in the estimate

MODULES & SESSION TITLES

Session 3: Project Administration

January 5-6, 2017

- Introduction to Safety Planning
- Project Staffing & Planning
- Planning for Environmental & Sustainability Concerns
- Scheduling
- Codes & Permits
- Material Handling
- Documentation & Visualization
- Project Closeout & Module Summary

Session 4: Contract Administration

February 9-10, 2017

- Introduction to Law & Project Contracting
- Contract Basics
- Negotiating Fair Contracts
- Contract Documents
- Payment Terms
- Legal Issues
- Contracting with Others for Required Work
- Contract Termination

Session 5: Risk Management

March TBD, 2017

- Introduction to Risk
- Insurance & Bonds
- Warranties & Liability Periods
- Managing Risk
- Quality of Workmanship
- Conduct of Employees
- Project Risks
- Risk Allocation & Module Summary

MODULE LEARNING OBJECTIVES

Session 3: Project Administration

- Gain an awareness of how pre-project planning affects the potential success of a project
- Understand the different areas of planning for the construction phase of a project
- Develop knowledge of LEED®, environmental issues, and lean construction
- Broaden awareness of how building codes, permits, reviews, and inspections have impact
- Learn the importance of scheduling, including the importance of purchasing long-lead items
- Understand the basics of the Uniform Commercial Code and material handling risks
- Learn the importance of document control, including submittals, RFIs, and shop drawings
- Learn how Building Information Modeling (BIM) is impacting the construction industry
- Understand the importance of project closeout and warranty management

Session 4: Contract Administration

- Understand how basic contracts are structured, how different types of contracts are used, and how project documentation relates to effective contracting
- Increase awareness of important contract law and language, and how they are related to project risk
- Understand the difference between agent and independent contracts, torts and contractual liability cases, and criminal and civil proceedings
- Learn how different project delivery methods use different contracting strategies
- Improve knowledge of the process for contract amendments, changes, extensions, and final terms
- Distinguish between partial and material breaches and understand the significance of termination, bankruptcy, and breach of contract claims

Session 5: Risk Management

- Gain awareness of how risk changes over the different phases of a project
- Understand the types and sources of risk
- Learn techniques for managing risk, specifically risks that are the contractor's primary responsibility
- Learn how the scope and nature of risk management varies based on project contracting method
- Learn about warranty periods and liability tails
- Understand the basics of insurance and bonding
- Appreciate the importance of documentation in controlling risk
- Learn how quality control/quality assurance plans help mitigate performance risk
- Learn how risk and profit are related

Completion Requirements

Participants are expected to arrive on time, attend the program from start to finish, and complete the post-program evaluation. Successful completion is also determined based on contribution to in-class discussion and activities.

PMDP Benefits

The objective of the PMDP is to increase the efficiency and effectiveness of construction project managers by providing instruction on the art and science of project management. Participation will better prepare professionals to make the transition from entry-level positions to positions of increasing responsibility as a project manager.

Program Instructors

Construction professionals from throughout the country will be teaching the curriculum.

Brought to you by:
