Mechanics Institute – 20 West 44th Street, New York, NY

Limited to first 25 registrants

The Knowledge and Skills Every Construction Supervisor Must Have to be Effective

The Associated General Contractors of America's Supervisory Training Program (STP) is a construction-specific training curriculum developed, updated, and field-tested by and for contractors and is the professional development resource for more than 130,000 construction supervisors and managers nationwide. If you are a manager of people, time, equipment or materials, STP can help you improve your supervisor skills and your organization's bottom line.

Unit 3 | Planning & Scheduling – 10 Classes (April 10-June 12, 2018)

- Unit 4 | Contract Documents
- Unit 5 | Improving Productivity and Managing Project Costs
- Unit 6 | Risk Management and Problem Solving

Instructor: Fred Spidalieri, Vice President, Alexander Wolf & Son

The **General Society of Mechanics & Tradesmen of the City of New York** was founded in 1785 by the skilled craftsmen of the City. Today, this 230-year old organization continues to serve and improve the quality of life of the people of the City of New York through its educational, philanthropic and cultural programs.

STP is offered nationwide through AGC chapters, individual construction firms and educational institutions. Gain the knowledge and skills every supervisor needs with AGC's STP.

This course includes the following sessions, case studies and topics:

Supervisory skill—or the lack of it—directly affects every company's bottom line. Each day decisions made by every foreman and superintendent are crucial to the success or failure of every construction project. You make your money in the field. Or you lose it.

The Supervisory Training Program (STP) developed by AGC, is designed specifically to meet the needs of the construction industry. Developed, updated, and field-tested by and for contractors, the Program consists of 6 courses that focus on the knowledge and skills that every supervisor must have to be an effective manager of people, time, equipment and materials.

This course includes the following sessions:

Planning and Scheduling: introducing concepts and skills used in planning and scheduling; defining the planning process; comparing day-to-day planning with long-term planning.

Preparing the Project Plan: defining construction activities; activity scope or size; duration of activities; putting the activities together; activity relationships.

Communicating the Plan: what needs to be communicated; developing and using the Bar Chart; the tabular schedule; scheduling material delivery.

The Critical Path: network scheduling and the critical path; calculating lag into the network.

Scheduling Software and Applications: introduction to computer use in scheduling; entering data; the use of constraints in the scheduling process; using the resources feature with scheduling software; sorting and filtering activities; formatting options.

Using the Schedule on the Jobsite: crew allocation using the schedule; information for subcontractors and suppliers; the short-term schedule.

Updating the Construction Schedule: using the short-term schedule; updating the schedule.

The Schedule as Documentation: schedule revision after update; the schedule as documentation; subcontractor delay.

STP is offered nationwide through AGC chapters, individual construction firms and educational institutions. Gain the knowledge and skills every supervisor needs with AGC's STP.
