Over the years, ECA has developed one of the most successful Supervisory Training Programs (STP) in the country...over one-hundred Superintendent Courses since the inception of the program some twenty plus years ago, training over 3,500 local supervisors, trades people, and office personnel.

Unit #6, Risk Management and Problem Solving will cover the roles and responsibilities of a construction supervisor in accident prevention and loss control.

Topics will include:

- Safety leadership, communication and expectations
- Planning for site safety
- Site safety management
- Site security and protection
- Multi-employer jobsite safety
- Construction risk management
- Safety and human resources
- Regulatory procedures, record keeping and documents

❖ Risk Management and Problem Solving is for Superintendents and foremen, people who aspire to become superintendents and foremen; people who work with superintendents and foremen; supervisors who work for subs; field secretaries; owners, architects, and engineers; anyone who communicates with the job site.

If you have any employees who may be interested or if you would like additional information on the STP, please call or e-mail Laura Regan at ECA (518-869-0961/laurar@ecainc.org). The Program has been developed by the Associated General Contractors of America. More than 200,000 individuals have participated in STP courses nationally. It was developed by contractors for contractors. Give it a look if you haven't already done so!

6 Airline Drive ❖ Albany, New York 12205
